# PLANS

Radio Shack, in keeping with a long-standing tradition of service after the sale, is proud to announce another service to our customers—Extended Service Plans. Radio Shack offers the most advanced in-house service network in the microcomputer industry. Now you, our valued customer, can enjoy the benefits of annual service agreements for your TRS-80 system.

Radio Shack Service Centers are strategically located throughout the contiguous United States to support the needs of our customers. Many of these facilities are housed in Radio Shack Computer Centers and specialize in TRS-80 maintenance.

Extended Service Plans give TRS-80 owners many additional services . . . available exclusively through the service agreements:

## PRIORITY SERVICE

Owners of Extended Service Plans are assured of fast, professional work. Equipment covered by one of the plans is serviced before any other equipment. This minimizes down-time!

## NO "SURPRISE" REPAIR COSTS

Equipment covered by an Extended Service Plan will incur no additional charges. You will have the capability to plan your budget for an entire year!

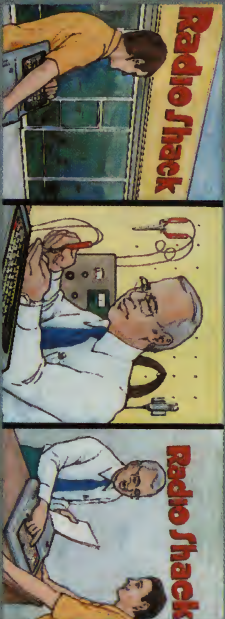

## INFLATION PROTECTION

"Public enemy number one" is inflation. Radio Shack's Extended Service Plans let you beat the rising costs of parts and labor. This way, you will get tomorrow's service . . . at today's price!

At least one Extended Service Plan is available for every TRS-80 system—from our Model II Business System to our Pocket Computer. In fact, many TRS-80 owners have two options—In-Shop or On-Site service.

## IN-SHOP

The In-Shop Extended Service Plan is our most popular and affordable service agreement. Its low price and availability have made it the choice of thousands of TRS-80 owners. Small businesses, home users, schools and amateur programmers have found that their equipment can be maintained at considerable savings.

As the owner of an In-Shop Extended Service Plan, you will receive unlimited remedial service at any Radio Shack Service Center. You need only take your equipment to your local Radio Shack store. The equipment will be sent to the service facility, repaired, and returned to your Radio Shack store. You may then pick it up. It's that simple!

## ON-SITE

More and more, businessmen and educators are turning to the convenience of an On-Site Extended Service Plan. The On-Site plan is invaluable if you need immediate service at your location.

A technician will respond promptly to your call. All parts, labor and travel expenses are covered during regular working hours. Speedy remedial service is assured, but it doesn't end there! Radio Shack will also provide *Scheduled Preventive Maintenance Service*. Our technicians will

even install your equipment and assemble your TRS-80 furniture!

An Extended Service Plan is the ideal protection for your TRS-80 equipment. Thousands and thousands of satisfied customers will attest that Radio Shack is the best microcomputer marketing company in the world today. Extended Service Plans are another reason why Radio Shack continues to be

**The biggest name in little computers™**

For complete details on obtaining an Extended Service Plan for your TRS-80 system, complete and mail the bottom portion of this brochure. If you don't already own a TRS-80 system, ask your local Radio Shack representative about our Extended Service Plan Discounts.
